DETAILED ACTION

1. Claims 1-27 are presented for examination. Claims 1, 9, 18 and 25 have been amended.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-27 are rejected under 35 U.S.C. 102(e) as being anticipated by Picard et al. (US 6,233,318).

4. As per claim 1, Picard teaches the invention as claimed including a method of managing a plurality of messages stored in a plurality of individual message accounts [col. 1, lines 44-67] comprising the steps of:

accepting a user access request at a access port [80, Fig. 2] to access selected ones of the plurality of individual message accounts, wherein the plurality of individual

message accounts are determined based on information associated with the user [col. 4, lines 19-23 & 40-46; col. 6, lines 29-34]; and

transmitting a set of access requests to a corresponding set of the individual message accounts [col. 5, lines 24-44; col. 5, line 61 – col. 6, line 10].

5. As per claims 2-3 and 7-8, Picard teaches the step of transmitting a consolidated message list, including at least the messages pending in each of the selected individual message accounts [col. 7, lines 13-19]; associating the message process request with the corresponding messages in the consolidated message list [col. 7, lines 20-21]; and transmitting the message process request to the corresponding set of individual message accounts [col. 5, lines 36-39; col. 7, lines 21-23].

6. As per claim 4, Picard teaches the message access port comprises a proxy server [col. 10, lines 7-12 & 46-54; col. 19, lines 50-54].

7. As per claim 5, Picard teaches the individual accounts have assignable network address [col. 1, lines 44-51].

8. As per claim 6, Picard teaches the POP standard is utilized in at least one step [col. 12, lines 11-14 & 29-33].

Art Unit: 2154

9. As per claims 9-17, since they are system claims of claims 1-4 and 6-8, they are rejected under the same basis as claims 1-4 and 6-8.

10. As per claims 18-24, since they are means claims of claims 1-4 and 6-8, they are rejected under the same basis as claims 1-4 and 6-8.

11. As per claims 25-27, since they are computer program claims of claims 1-3, they are rejected under the same basis as claims 1-3.

Conclusion

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Rajan et al. (US 6,633,910) discloses a system for notification of updating information on different servers; and

Bunny (US 6,487,584) discloses a system for managing multiple personality Internet accounts.
